BOTTLED BEER

PAULANER HEFE-WEIßBIER 0,0%

Thanks to the balanced combination of fine malt notes, refreshingly fruity wheat beer aromas and a pleasantly light sweetness, our 0.0% wheat beer is a non-alcoholic treat for every occasion. The isotonic thirst quencher is first brewed using the traditional Paulaner wheat beer process and is gently dealcoholized only after extensive maturation. A complex process that removes all alcohol from the beer, but not its refreshing aroma! You will notice with every sip that this effort is worth it!

BEST INGREDIENTS

ACCORDING TO THE BAVARIAN PURITY LAW

The secret to making good beer is in using the best ingredients. According to the Bavarian Purity Law ("Reinheitsgebot"), only four ingredients are allowed to be used in the beer brewing process. Our Paulaner brewmasters choose only the best raw

materials: hops from the Hallertau region, Munich yeast, selective brewing malt and the purest water. The finer the ingredients, the better the beer. That's why our brewmasters periodically check all the raw materials with the utmost care.

HOPS

The Hallertau region in Bavaria is known for its largest, connected hops-growing area in the world and its outstanding quality. These aromatic hops are particularly useful for the production of beer: depending on the variety and quantity they give beer a subtle to intense level of bitterness and a refreshing, bitter taste. Also, hops have a positive effect on a beer's head and shelf life. The hop oil contained in the cones, gives beer its distinct aroma, known as a hop bouquet.

YEAST

Yeast is one of the crucial factors for the later quality and taste of beer. Despite being just tiny yeast cells and unrecognizable to the naked eye, they significantly impact beer: only by adding yeast can fermentation begin, which converts the malt sugar into alcohol and carbon dioxide. In addition, yeast is creating aroma substances that will shape how a beer tastes. All the wheat beers are made with top-fermented yeast, while all of the other types of beers, like lager, Dark or Pilsner, are brewed from bottom-fermented yeast.

MALT

Malt is another important raw material in our beer. Paulaner brewmasters use only the finest malt. Our quality beers are made from barley malt and wheat malt. Wheat malt is used primarily for the production of our wheat beers. The brewing malt is responsible for the taste and the color of the beer. The color is determined by the type of malt, which is brought out during the drying process.

WATER

The best brewing water is the main component of Paulaner Bräuhaus beer specialties. Its extreme softness and purity guarantee beer enjoyment of the utmost quality.
